Professional Summary

Detail-oriented Geospatial Data Analyst with hands-on experience in GIS, remote sensing, and spatial analysis through industry internship and academic projects. Proficient in ArcGIS Pro, QGIS, ERDAS IMAGINE, and Google Earth Engine, with expertise in satellite image processing, land use/land cover mapping, DEM analysis, change detection, and geospatial data management. Experienced in digitization, georeferencing, spatial modeling, machine learning data preparation, and thematic map production for environmental and urban applications. Skilled in field data acquisition using GPS, DGPS, UAV, and Total Station, with a strong foundation in Earth observation, geospatial analytics, and spatial decision support.

Technical Skills

GIS & Remote Sensing: ArcGIS Pro, QGIS, ERDAS IMAGINE, Google Earth Engine (Basic), Google Earth Pro
Survey & Data Acquisition: GPS, DGPS, Total Station, UAV, Mission Planner
Programming & Database: Python (Basic), SQL (Basic)
Data Visualization & Productivity: Power BI, Tableau, Microsoft Office, GeoSetter

Professional Skills

Soft Skills: Teamwork, Problem Solving, Time Management, Adaptability, Communication
Languages: English, Hindi, Bengali

Professional Experience

GIS Intern **Jan 2025 – Apr 2025**
Vasundharaa Geo Technologies Pvt. Ltd. **Pune, India**

- Executed forest fire classification and frequency analysis using remote sensing data, improving risk identification across target zones.
- Prepared and validated high-quality training datasets for machine learning and deep learning models.
- Conducted geospatial data processing and spatial analysis for urban and environmental studies.
- Performed digitization, map design, and spatial modeling for web-based GIS applications.
- Streamlined GIS workflows through raster-vector conversion and layer reclassification.
- Collaborated with multidisciplinary teams to deliver geospatial outputs for environmental monitoring and decision support.

GIS Cartographer (Freelance) **May 2026**
Maritime Security Research Project

- Designed and developed five publication-quality thematic maps supporting research on India's maritime security and the Indian Ocean Region.
- Created GIS maps of coastal radar networks, mission-based deployments, maritime partnerships, and Sea Lines of Communication (SLOCs).
- Applied cartographic principles including map layout design, labeling, scale bars, north arrows, and spatial buffer analysis.
- Produced publication-ready maps using ArcGIS Pro and QGIS in collaboration with the research author.

Campus Ambassador **Jun 2026 – Present**
YouthYatra *Savitribai Phule Pune University, Pune*

- Selected as the official Campus Ambassador for YouthYatra to represent the organization at Savitribai Phule Pune University based on leadership potential, initiative, and student engagement.
- Promote entrepreneurship, innovation, and leadership initiatives by connecting students with workshops, networking events, and startup opportunities.
- Organize and coordinate campus outreach activities, increasing awareness and participation in YouthYatra programs while fostering an active student community.
- Collaborate with the YouthYatra team to execute promotional campaigns, strengthen university partnerships, and support nationwide student engagement initiatives.
- Develop leadership, communication, event management, public speaking, and stakeholder coordination skills through continuous ambassador responsibilities.

Projects

1. **Forecasting the Future of India's Agricultural Land: Spatio-Temporal Trends, Potential Threats and Implications for Food Security**

   Research project integrating GIS, Remote Sensing, and time-series forecasting to analyze changes in agricultural land and project food security challenges in India through 2050.

   Applied spatial data analysis and statistical forecasting using agricultural, demographic, and land-use datasets to evaluate future trends in arable land, crop productivity, crop production, and population growth.

2. **Developing a Climate-Adjusted Women's Empowerment Index for Spatiotemporal Analysis of Regional Disparities Across Maharashtra Districts, India** *M.Sc. Dissertation*

   Developing a GIS-based framework integrating socio-economic and climate datasets for spatiotemporal assessment of regional disparities across Maharashtra.

3. **GIS-Based Assessment of Transportation Network Impacts on Air Quality, Climate Vulnerability & Health in Kolkata**

   GIS project integrating transportation networks, environmental quality indicators, and climate vulnerability assessment to support sustainable urban planning.

4. **Spatio-Temporal Change Detection — Mukutmanipur Region (2014–2024)**

   Remote sensing project using multi-temporal satellite imagery to monitor land use and land cover dynamics over a decade.

Education

M.Sc. in Geoinformatics 2026
Savitribai Phule Pune University Pune, India

B.Sc. (Hons) in Geography 2024
University of Calcutta Kolkata, India

Class XII 2021
West Bengal Council of Higher Secondary Education Kolkata, India

Certifications

- **Satellite Data Analysis for Weather & Climate** — Indian Institute of Tropical Meteorology (IITM), Pune, in collaboration with the Centre for Sustainable Environment and Education (CSEE) Mar 2026
- **Generative AI Mastermind** — Outskill 2026
- **Advanced Geospatial Technology & Its Application Research** — IIARI Jul 2024
- **QGIS and Its Applications** — IIARI May 2024
- **Information Technology Certification** — Ramakrishna Vivekananda Mission 2018

Conference Presentation

National Conference on Geospatial Technologies and Sustainable Landscapes (GTSL–2026) Feb 2026

Department of Geography (Geoinformatics), Savitribai Phule Pune University

Additional Information

Interests: Landscape & Rail Photography, Long-distance Cycling, Trekking, Cooking
